Prediabetes: Are you at risk?

What is prediabetes?
Prediabetes is a condition in which blood glucose levels are higher than normal but not high enough to be diagnosed as type 2 diabetes.

Are you at risk?
You could have prediabetes if you:
- Are 40 years of age or older
- Have a BMI that is categorized as overweight or obese
- Have a history of gestational diabetes
- Have a family history of type 2 diabetes
- Have certain medical conditions like high blood pressure
- Have a sedentary lifestyle

Why act now?
If you have prediabetes, you are at higher risk for developing type 2 diabetes or other medical issues in the future.

Here’s the good news …
If you are diagnosed with prediabetes, there are treatment options to help prevent or delay type 2 diabetes.

Your treatment options may include the National Diabetes Prevention Program lifestyle change program, medication or medical nutrition therapy.
